

SHIVAM KUMAR

Product Designer | Design Engineer | React Native

About Me

Building products through React Native, UX, and motion systems.

Bangalore, India

Language

- English
- Hindi

Education

- Bachelor of Design
NIFT
- BA in VFX Arena Animation
- CERTIFICATIONS & CONTINUOUS LEARNING
- Google UX Design Certificate
- CS50 – Introduction to Computer Science (In Progress)
- Scrimba – Frontend Development Path (In Progress)
- React & React Native Learning Track
- Continuous self-directed learning in:
- Product Design, UX Research, Interaction Design, Frontend Engineering, Motion Systems, and AI-assisted workflows.

Product Perspective

I spent 7 years creating motion systems, animations, and visual experiences before transitioning into product design and engineering.

Today I work across the full product lifecycle—from understanding user behavior and defining experiences to designing interfaces and building production-ready applications.

My work combines UX thinking, interaction design, motion systems, and frontend engineering to create products that feel intuitive, responsive, and purposeful.

Most recently, I designed and built ZINC, a React Native fintech application where I owned product strategy, UX decisions, interaction design, motion systems, and frontend implementation.

I care deeply about user psychology, product clarity, interaction quality, and the small details that make digital products feel effortless.

ZINC

Personal Product • Design Engineering Project

ZINC began with a simple observation:

People often discover recurring subscriptions only after checking multiple bank statements manually.

I explored how AI-assisted statement analysis could surface recurring payments automatically and make subscription management easier.

As the sole builder, I owned the complete product lifecycle:

- Problem discovery and UX exploration
- User flows and information architecture
- Interface design and interaction design
- Motion system design using Reanimated 3
- Frontend implementation using React Native
- Firebase authentication and infrastructure
- AI-powered statement analysis workflows

The project became a practical exercise in product thinking balancing user needs, technical constraints, motion design, and engineering decisions within a single product experience.

SKILLS

Product & UX

- UX Design
- Product Thinking
- User Flows
- Information Architecture
- Interaction Design
- Wireframing
- Design Systems

Engineering

- React Native
- React
- TypeScript
- JavaScript
- Firebase
- Reanimated 3
- GitHub
- TailWind
- Native Wind

Motion & Visual

- After Effects
- Rive
- Figma
- Illustrator
- Photoshop

EXPERIENCE

CLEVERTIZE

Senior AI Creative Designer. Product Communication
2025

Worked at the intersection of product communication, creative systems, and AI-assisted content production.

- Designed scalable creative systems that enabled rapid experimentation across multiple ad concepts and campaigns.
- Built modular motion frameworks that reduced production effort while maintaining consistency across assets.
- Collaborated with growth and marketing teams to improve communication clarity, user attention, and campaign performance.
- Leveraged AI-assisted workflows to accelerate creative iteration and creative testing.
- Focused on understanding audience behavior, visual hierarchy, messaging effectiveness, and conversion-driven design decisions.

Key Focus:

Creative Systems • User Attention • Experimentation • AI Workflows • Growth Design

PLAYSIMPLE GAMES - Mobile App

Motion Designer • UX & Product Experiences
2024 – 2025

Worked across motion design, visual systems, and user-facing experiences for mobile gaming products.

- Designed product-facing visual experiences focused on user engagement and retention.
- Created layouts, interaction concepts, and motion systems supporting gameplay and user communication.
- Collaborated with product, growth, and creative teams to align user experience with business goals.
- Applied principles of user psychology, attention management, and visual hierarchy to improve engagement.
- Built scalable creative systems enabling rapid experimentation and iteration.
- Leveraged AI-assisted workflows to accelerate production and creative exploration.

Key Focus:

User Engagement • Product Experiences • Visual Systems •
Motion Design • User Psychology

MPS LIMITED

Creative Lead / Motion Designer. Visual Communication
2020 – 2023

Led end-to-end design and motion projects for global education and publishing brands including Apple, National Geographic, Oxford, and Pearson.

- Transformed complex information into intuitive visual experiences through storytelling, information hierarchy, and interaction-focused thinking.
- Managed project execution from concept development through final delivery while maintaining quality standards and timelines.
- Collaborated with clients, stakeholders, designers, and production teams to align business requirements with user understanding.
- Mentored designers and reviewed creative outputs to ensure consistency, clarity, and usability.
- Developed a strong foundation in communication design, user comprehension, content structure, and experience design principles.

Key Focus:

Information Design • User Understanding • Visual Systems •
Design Leadership • Stakeholder Collaboration
